

Taylor Che

Product Designer

Experience

Product Designer @ Microsoft, Xbox

August 2024-Present | Redmond, WA

- Served as the first designer to bridge teams between our organization and the Windows group, initiating and leading ongoing UX collaboration for next-generation Windows handheld devices
- Developed several system-level interaction models and prototypes informing early platform experiences for Windows handheld gaming hardware
- Led UX design for the Handheld Compatibility Program, establishing a framework that communicates which games run across Windows handheld devices and supports compatibility visibility across hundreds of titles
- Simplified filtering workflows by redesigning interaction patterns and establishing a scalable filtering framework supporting multiple endpoints across contexts such as store and library
- Re-architected the Xbox settings experience using Claude to rapidly prototype and validate a new information architecture and interaction system, establishing a consistent, scalable framework across mobile, desktop, and TV

UX Designer @ University of California, Los Angeles Library

September 2022-February 2024 | Los Angeles, CA

- Redesigned the Film & Television Archive site with 2 other designers, restructuring information architecture and core workflows to improve findability and achieve 80% task completion in usability testing with 10 participants
- Proposed a redesigned search experience and introduced an Advanced Search workflow, helping users recover when standard search queries failed to surface relevant content
- Presented UX recommendations to the UC Library Board, identifying 8+ systemic gaps and scalable improvements that received strong approval and informed UX enhancements adopted across other UC libraries
